

April 1, 2020. Ashland, OR: Code Blue Consulting, a leader in Bluetooth design, releases its new line of COVID-19 bathroom products: **BlueBar** wirelessly connected soap, **BlueRoll** toilet roll, and **BlueBuns** Bidet, all supported by our industry-leader in bath connectivity **BlueCloud**.

BlueBar makes the tedious task of 20-second timing a breeze with user-configured song choice and real-time soap connectivity and reporting:

- Measure/report the water temperature to assure optimal CDC-recommended anti-viral action through your phone directly to **BlueCloud**.
- Customize the built-in 20 second timer directly from Spotify or iTunes with your favorite hand washing song, delivered wirelessly to your Bluetooth headset. Factory-supplied tunes include: happy birthday, ABC's, the Jeopardy song, and the 1812 overture.
- Connect **BlueCloud** connects to all door cameras and connected door locks to assure that you've washed your hands whenever you enter:
 - Provides personal identification using door camera facial recognition to remind the correct individual.
 - Delivers reminders through Alexa or Siri, escalating from reminders and nags to all out screaming.
 - Integrates with IoT (Internet of Toiletries) and IoS (Internet of Soap) hand sanitizer dispensers for seamless coverage when you are unable to wash with **BlueBar**.

NEWLY introduced for 2020: Our **BlueRoll** toilet paper roll includes theft-protection and alarms, automatic reminders for replacement, and paper overuse identification. Supported by **BlueBuns** Bidet (described below), the system identifies the user and the new **BlueNose™** accessory confirms when a socially acceptable cleanliness level has been obtained.

Our latest back-end product: the **BlueBuns** Bidet. It too supports **BlueNose** cleanliness detection and personalized configurations based on Bi-lateral Automatic Gluteal Recognition (BAGR) technology. It identifies individuals using its patent-pending BAGR mechanism to eliminate the need to turn the other cheek. **BlueBuns** and **BlueRoll** work together to provide a natural user interface for fine-tuning and water savings, wipeRight™ and wipeLeft™:

- wipeRight for extra-strength cleaning action
- wipeLeft for a gentle experience
