

Short-range medical device connectivity for personal health devices

Bill Saltzstein
Code Blue Consulting
ORCA April 19, 2017

Agenda

- * Who am I, and how did I get here?
- * Short-range wireless connectivity
- * Regulatory pathway
- * Issues

Who am I?

- * EE, University of Rochester
- * HP Calculators (HP-71B, HP-18/28)
- * HP Cardiology (Pawewriter XL ECG, CodeMaster Defibrillator)
- * Instromedix (LifeSigns Home Health)
- * Medtronic Physio-Control (Dir. Adv. Dev.)
- * Code Blue Communications (Bluetooth modules, consulting)
- * connectBlue (Sales and Marketing)
- * Code Blue Consulting & Coconut Manor (BTLE products)
- * Cinq Cellars winery (gratuitous plug)

Consumer, Type I, II, III devices, 510(k), PMA, PMAs

All medical (and health) devices *shall* be connected

- * Why?
- * Where?
- * How?

All medical devices *shall* be connected – Why?

- * Replace wired connections
 - * Mobility/safety
 - * Data collection
- * Telemedicine
 - * Remote consultation & review (*photo*)
 - * Home Health
 - * Aging in Place
- * Health and Fitness
- * Cloud connectivity
 - * Electronic Health Record (EHR)
 - * Big Data analytics

ORCA 04/19/17 - Saltzstein

5

4/19/17

All medical devices *shall* be connected – Where?

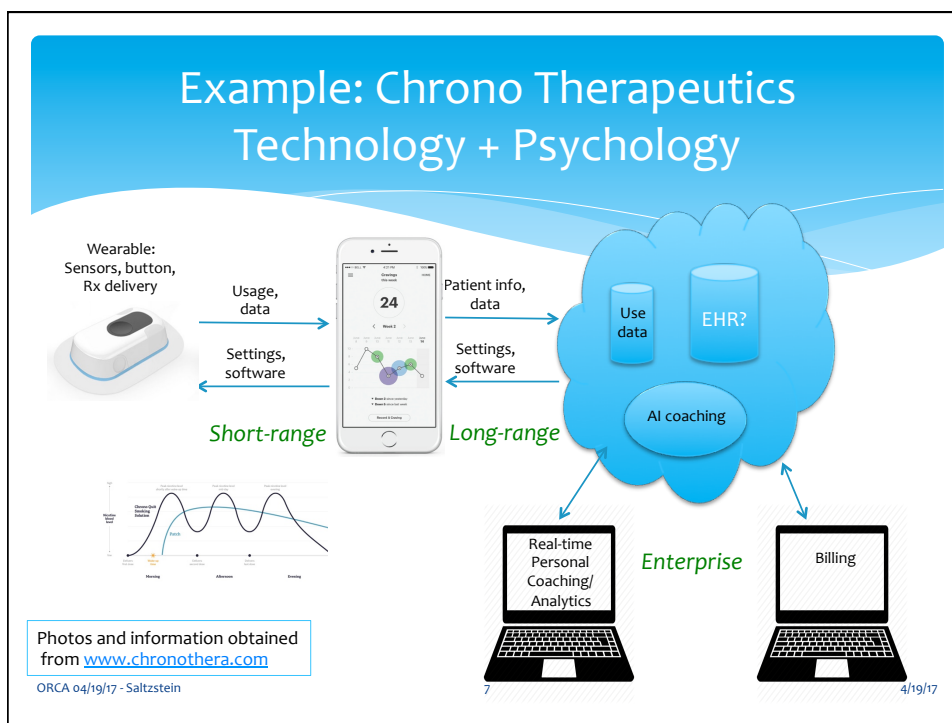

- * Classic answers:
 - * Hospital
 - * EMS
 - * Home
- * Real answers:
 - * Starbucks
 - * 37,000 feet
 - * Stuck on I-5
 - * In the bathroom
 - * In the elevator
- * Real environments require creative solutions for connectivity

ORCA 04/19/17 - Saltzstein

6

4/19/17

Wandering and wondering in the wide world of short-range wireless

- * Two real choices for short range data transfer
 - 1) WiFi – IEEE802.11
 - 2) Bluetooth
 - a) Bluetooth classic
 - b) Bluetooth low energy
- * Everything else
 - * RFID/NFC – expect usage in UDI and asset tracking
 - * ZigBee, Thread – IEEE 802.15.4 based – coexistence challenge
 - * MICS (Medical Implant Communication System) – supply, \$\$
 - * MBAN (Medical Body Area Network) - ??

ORCA 04/19/17 - Saltzstein

8 4/19/17

How to choose?

- * Requirements and environment!
 - * If you need long-range, independent connectivity → cellular
 - * If you're in hospital and need EHR connectivity → WiFi
 - * For anything else → Bluetooth
 - * Full disclosure: I'm a Bluetooth geek...
- * Right, now which flavor of Bluetooth?
 - * Bluetooth classic if
 - * Audio
 - * High-rate streaming
 - * Long range
 - * Else – Bluetooth low energy
 - * For now... Bluetooth 5 provides for those needs if you can wait

ORCA 04/19/17 - Saltzstein

9

4/19/17

The 3 groups of regulators

- * Medical regulatory requirements
 - * US FDA
 - * EU Medical Device Regulation (and what about the UK?)
 - * ...
- * Wireless standards bodies
 - * Bluetooth SIG – legal requirement
 - * No IEEE approval (IEEE 802.11)
 - * WiFi Alliance – marketplace requirement?
- * Radio regulators - required
 - * FCC – US
 - * SAR for patient-worn devices)
 - * IC – Canada
 - * EU – ETSI, R&TTE
 - * Japan – MIC
 - * And others...

ORCA 04/19/17 - Saltzstein

10

4/19/17

... and the 4th group: “interoperability”

- * Interoperability is a dual-edge sword
 - * Marketing
 - * Regulatory
- * AAMI – primarily for in-hospital devices
- * Continua Alliance
- * Bluetooth SIG profiles
 - * Bluetooth Transcoding Whitepaper
 - * Health/medical profiles – use them if you wish
 - * With Bluetooth low energy you can make your own
- * FHIR, HL7, ...

Continua
HEALTH ALLIANCE

What is the FDA looking for?

- * Safety and efficacy in the intended use environment
- * Interference & Coexistence
 - * Ad-hoc testing based on environment for Intended Use
 - * RF Guidance document
- * Latency & Throughput
 - * Consider degradation again based on environment
- * Cybersecurity
- * Trends
 - * Support of personal and consumer health and medical devices
 - * Reclassification activities
 - * Open acknowledgement of enforcement policies

Summary

- * The true secrets are in Understanding and Planning
- * Understand where and how connectivity benefits/ enables your system
- * Understand the use models
- * Pick the technology and system components based on the requirements, not the cool-factor
- * Design-in for regulatory and security up front

Q&A

- * Bill Saltzstein
